Burberry Planning Assumptions

Secure the long term value of our brand
Ensure we have financial headroom to fuel growth

NEAR TERM GUIDANCE

- Q2 sales to continue to be materially impacted by COVID-19
- Uncertainty due to virus progression, the risk of second waves and reduced tourist flows
- Q2 retail comp sales -15% to -20%
- H1 Wholesale expected to decline 40% to 50%
- On this trading assumption:
  - H1 Gross margin to decline 200bps to 300bps
  - H1 Opex to decline by a mid-teens percentage
SUMMARY

H1 trading impacted by COVID-19 pandemic

Continuing to strengthen the brand

Continuing to excite the consumer with new product and innovative campaigns

Organisational changes to increase product focus and operational efficiency

Investing in consumer facing activities in recovering markets

ALTERNATIVE PERFORMANCE MEASURES

All metrics and commentary in this presentation are at reported FX and exclude adjusting items unless stated otherwise.

Constant exchange rates (CER) removes the effect of changes in exchange rates compared to the prior period. It incorporates both the impact of the movement in exchange rates on the translation of overseas subsidiaries’ results and also on foreign currency procurement and sales through the Group’s UK supply chain.

Comparable sales is the year-on-year change in sales from stores trading over equivalent time periods and measured at constant foreign exchange rates. It also includes online sales. This measure is used to strip out the impact of store openings and closings, or those closures relating to refurbishments, allowing a comparison of equivalent store performance against the prior period. The measurement of comparable sales has not excluded stores temporarily closed as a result of the COVID-19 outbreak.

Certain financial data within this presentation have been rounded.
